We will be with you all the way! A dedicated Account Manager and Technical Lead, will be assigned to your project(s) and they will assist with the design, implementation and management of each piece of the project from the site survey through to completion.

Technology Products & Services Overview

Step 1	Step 2	Step 3	Step 4	Step 5
Cabling & Network/Security Solutions	**Hardware & Software Sales**	**Server Technology Design & Integration**	**Training, Web & Internet Services**	**Business Continuity Services**

Step 1

Structured Cabling System
Whether its a new or existing building, we will solve your cabling worries.
- Data Networks
- Phone Network
- Central UPS
- CCTV
- Access Control Systems
- Sound Systems
- Cable TV

Network Design & Implementation
A good network design is the bedrock for all other IT Services.
Our network services include:
- LAN
- WAN
- VPN
- VOIP

Security/Surveillance Design & Implementation
Our security/surveillance design services include:
- CCTV System
- Access Control System

*softwareshop limited also offers a **FREE** Consulting advice and site evaluation to understand your cabling needs.*

Step 2

Hardware Sales, Installation & Support
- PCs: *Laptops, Desktop, All-In-One etc*
- Servers: *Tower Servers, Rack Servers, Entry-Level Servers, Enterprise Servers etc*
- Tablets: *iPad, Asus, Samsung Galaxy Tab etc*
- Printing Equipment: *Printers, Plotters, Photocopiers etc*
- Power Backup Devices: *UPS, Inverters, Batteries, Industrial AVR etc*

Talk to us if you have any problem with your equipment.

HELP

Software
- Office Productivity Tools: *Micosoft Office suites, Adobe & Corel products etc*
- Antivirus: *Norton, Kaspersky, Mcafee etc*
- Operating System: *For Servers & PCs*
- Accounting: *QuickBooks, Sage, Peachtree etc*
- Business Applications
- Customized Applications

*we sells all products and services with warranties Guaranteed!
we know how to match them up seamlessly to your business. Let us help take your business to the next level, using world renowned applications, tailored to your business needs.*

Step 3

Domain Architecture & Security
Implement Domain Architecture and take the control of your network, users, devices, Multi-level file & folder security etc.

Mailing
Enjoy the a seamless mailing solution with the following features:
- Integration of e-mail and calendaring
- Integration of task management
- Calendar sharing
- Comapny wide mails are centrally managed

Collaboration
- Connect and empower your employee by enhancing teamwork
- Facilitate employee self-service
- Standardize content management

Virtualization
Optimize your server hardware investments by consolidating multiple server roles as separate virtual machines running on a single physical machine, efficiently run multiple different operating systems in parallel, on a single server.

*we offers a **FREE** consulting advice on the design, integration & mplementation of the server technologies to match your business requirements.*

Step 4

Training
To get the best out of your ICT investment, you need to make sure your employees are competent in their ability to optimize application functionality.

Email, Domain Hosting & Website
Email is the most popular business tool for communication. **Email sent from your own company domain is a corporate statement**. Why use public domain emails like abc@yahoo.com when it could be abc@mycompanyname.com.

Your **WEBSITE** is your WORLD office. Make it a Sales Tool to showcase what you do to the world.

eMarketing
Online advertising is the most cost-efficient way of reaching a wider audience.

*Professionally designed Customised Training for all levels of expertise. Because one size doesn't fit all, we tailor our training to match your company objectives. **Domain Purchase, Email Hosting, Website Development**. One package under one roof. We will have you up and running your own domain in 24hrs.*

Step 5

IT Management & Outsourcing
Your complete environment needs to always operate at it's optimum, through the implementation of a seamless maintenance and management strategy.

Backup & Recovery Services
We can design a cost-effective backup solution that will suit your business needs. Because of our expertise in Data Recovery, our Backup Solution are geared towards easy recovery when needs arises.

Consulting
We offer a range of consulting services that enable us achieve our vision of helping our clients turn their challenges in to business successes: Business Analysis, Transformation Consulting IT Architecture Consulting and others based on client request.

*We can help manage your IT environment completely (outsourcing) or **Augment** your current IT staff to provide **Strategic Consulting** on Management Operations and **Future Technology Direction**.*
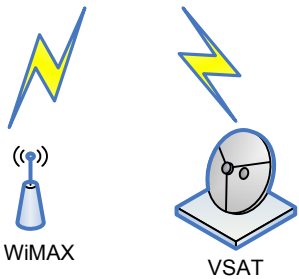

Structured Cabling & Network Solutions

Internet Solution (VSAT | WiMAX | Fibre)

We deploy a number of diverse internet packages through the use of different technologies depending on the clients location, number or computers, nature of business and budget.

Internet

WiMAX   VSAT

Structured Cabling Cabinet

Structured Cabling (Data | Voice | Video | Cable TV | Audio | Power)

A new or existing building (home, office, or hotel) requires professionally installed structured cabling, to support one or more of the **following Technology Services...**

Data Networks: This is the most primary requirement of IT shared services. You can achieve Secure Sharing & Management of all Company Files (Word, Excel, Acrobat, etc.), Platform for Managed Internet Connectivity and platform for Device Sharing & Mgmt (Printers, Wireless, Storage, etc.)

PABX/IP Phone Network: This will Facilitates communication within the home or office. Its features include: Plug and Play, when additional lines are needed; Integration of Phone Services with Computer Systems & Internet.

Central Sound Systems: This cabling will offer Consistent sound across office or homeas well as Public announcements across office for emergencies

Central UPS/Inverters: With UPS/inverter cabling, implement Central Uninterrupted Power to all UPS sockets in your company. Save Time & Money on maintenance of Individual small UPS'.

CCTV Systems: Before implementing a CCTV system, you need a well planned cabling.

Access Control Systems: Secure and controlled access to buildings.Time and attendance records for staff.

Cable TV: Scalable cabling for Cable TV which is just Plug & Play when additional TVs are needed. Central Control for Cable TV channels

Network Design & Implementation (LAN | WAN | VPN | VOIP)

SOFTWARESHOP LIMITED bears in mind Network Convergence (combination of Voice, Video and Data services onto a single IP-based network) whenever we design a network.
SOFTWARESHOP LIMITED Network Design delivers greater value to business including:
- Lower Operational Costs
- Open, scalable infrastructure
- Improved internal & external communications

A typical LAN Design

Remote Users connecting to Network through VPN

Benefits

- Professional Layout & Easy Management of Cabled Services

- Secure control from a central location

- Allows for cost effective and easy expansion of your Network (Future Ready)

- With a structured Cabling System, problems are easier to isolate and fix. This facilitates easy problem resolution

- Consistency: Same cables exist everywhere in the building

- Construction costs for the cabling of the Voice, Data, Central UPS, CCTV and other services can be reduced by up to 30% when you integrate the cabling and delivery methods.

- Moves, changes, rearrangements, and upgrades can be performed more cost-effectively, with a potential savings of 25-40% percent for material and labor

- Attractive to buyers/renters of property with structured cabling

- Higher Property Resale Value

*SOFTWARESHOP LIMITED will work with you from the start to understand your Business & Technology Objectives, so we can implement a **Sound Infrastructure Platform** to support all your current and future Technology needs. We will be with you all the way! A dedicated Account Manager and Technical Lead, will be assigned to your project(s) and they will assist with the design, implementation and management of each piece of the project from the site survey through to completion.*

Hardware Purchase & Configuration

G DATA CERTIFIED SECURITY-PARTNER ★ ★

Service & Support

We also support, repair & manage all the equipment listed.

Talk to us if you have any problem with your equipment.

*It is just as easy as pressing the **HELP** button!*

Deciding on **ICT Hardware** should be inline with your strategic objectives for achieving maximum productivity within your organization. It is imperative that you buy the RIGHT Hardware, with the RIGHT Capacity, from The RIGHT Vendor. A vendor that understands your strategic objectives and has the capacity to Supply, Install, Configure and Support the hardware you purchase...

SOFTWARESHOP LIMTED is able to get the right hardware for your specific needs. We are able to service warranties and get you the best value for your money.

Servers

Built for longevity. Needed to host Central Applications within your organisation
- Secure User and File Management - Domain Controllers
- Hosts Central Applications which support Concurrent Access i.e.
  Accounting, Email, Business Applications, Intranets, etc.
- Controls ALL activity on the network & Manages all Network Resources
- Continous Availability. Engineered to Manage its tasks 24hrs a day.
- Extended expansion options for upgrades

Rackmount Servers

Desktops
- Purpose driven – Entertainment, Personal or Business, ALL?
- Important to get the right capacity for the the intended purpose.
- Choose the right Operating System for Business, Home or Entertainment.
- Desktop type Consistency, helps Maintenance and Support.
- Expansion capabilities should considered.
- Integration with other hardware resources

Desktop Computer

Laptops
- Portable and robust for mobile computing
- Works just like a Desktop, but fewer expansion capabilities.
- Laptop power means you can continue working when during power outage
- Multiple component already built in i.e. webcam, microphone, Wi-fi, bluetooth. etc

Tablet
The high demand for mobile computing can not be over-emphasized. Whether you are at you desk or on the go, your business information needs to be available to you. iPad, Asus, Galaxy Tab

Network Device
- Consider number of Ports needed now and future
- Decide on Wired, Wireless or Hybrid
- Consider transmission speed – Gigabit Network
- Consider distance range of Wireless

Central UPS/ Inverter
- One point of Management
- Low maintenance cost
- Surge Protection against spikes in power
- Prevents data loss during power outage

Benefits

– Buying named brands, give you peace of mind as you are buying a brand with a rennowed track record.

– Guaranteed genuine components for durability and exceptional performance. Also an enjoyable user experience.

– Warranty Support is guaranteed as this comes from the Manufacturer, but serviced by us locally. Extended warranties are always available.

– Continuous online updates from the manufacturer keeps your hardware (Future Ready)

– Upgrade capability always available as the manufacturer always supports its hardware for a minimum of 10 years.

– Interconnectivity with other hardware from the same or different manufacturers is seamless as the equipment is always tested for compatibility.

– Higher equipment resale or exchange value.

we, will work with you from the start to understand your Business & Technology Objectives, so we can implement a **Sound Infrastructure Platform** to support all your current and future Technology needs. We will be with you all the way! A dedicated Account Manager and Technical Lead, will be assigned to your project(s) and they will assist with the design, implementation and management of each piece of the project from the site survey through to completion.

CCTV Systems

G DATA CERTIFIED SECURITY-PARTNER ★ ★

CCTV Cameras Types
- Internal Wall Mount Dome Cameras
- Internal/External Long Body Cameras
- Outdoor Cameras in Housing
- Point-Tilt-Zoom (PTZ)
- Hidden Cameras
- Speed Cameras
- Available Remote Viewing via Internet

CCTV Package – Flexible
- Up to 32 Internal/External cameras
- Colour or Black/White
- Day/Night Infra Red Cameras
- Auto Movement Sensing
- Point, Tilt, Zoom (PTZ) Cameras
- Remote Viewing via Internet
- Sound recording
- Remote storage in 2nd location.

We provide CCTV (Closed Circuit TV) systems for a variety of uses. The most common is for the purpose of ***Crime Prevention and Detection***. CCTV now play a huge part in reducing crime by means of a deterrent, and also in cases where the crime has taken place, the ability to review recorded footage, helps you review what really went on while you were away.

IP cameras offer more robust capabilities as the can be viewed and managed remotely. This offers extensive use of CCTV technology to capture all activity in a location where you are not present.

Complete overview of CCTV systems, showing several Camera Types and viewing devices Locally and over the Internet.

CCTV systems are a superb security system for homes and offices. It is the most effective tool in security management and loss prevention.

Having highly visible cameras covering vunerable areas of your premises reduces the opportunity to commit crime both from internal and external sources.

SOFTWARESHOP LTD, will carry out a **FREE, NO OBLIGATION** survey and quotation service, advising you on the potential security risks at your premises (home or business). We adopt a theory call "peeling the onion". We start from the outside perimeter and work our way in, ensuring that the CCTV system covers ALL movement areas in a continuous flow, so that you can track any activity from start to finish.

Benefits

- Crime prevention, serving as a deterrent to potential crime.

- Keeps employees under surveillance, so they are attentive to their work, thus being more productive.

- Helps to observe good or bad practices for employee evaluation.

- Used to observe production lines or large manufacturing companies, to help improve processes.

- Makes staff feel safe and reduces the fear of crime.

- More effective securoty personnel as they have the tool to effectively manage large premises.

- Less physical security personnel needed, saving on cost.

- The benefits of a CCTV security system far outweigh the financial cost for business owners.

*SOFTWARESHOP LIMITED, will work with you from the start to understand your Business & Technology Objectives, so we can implement a **Sound Infrastructure Platform** to support all your current and future Technology needs. We will be with you all the way! Corporate Training

G DATA CERTIFIED SECURITY-PARTNER ★ ★

Professionally designed & Customized Training for all levels of expertise. Because one size doesn't fit all, we tailor our training to match your company objectives.

To get the best out of your ICT investment, you need to make sure your employees are competent in their ability to optimize the functionality within the application(s) that are used in your organization.
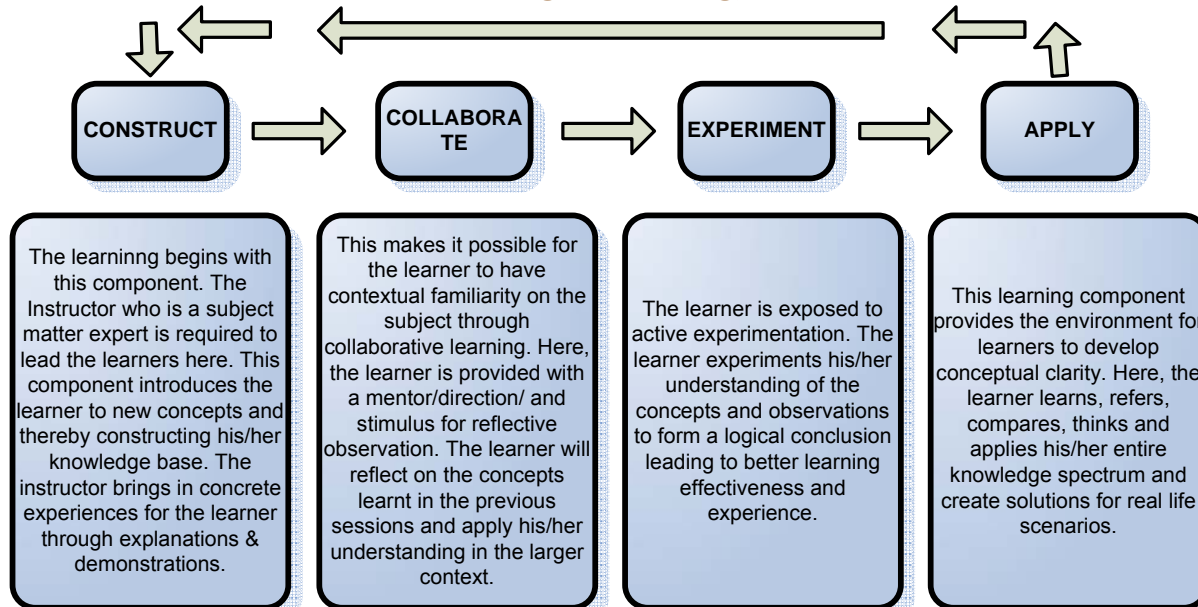

Training employees is an essential activity for all organizations to stay ahead of the competition. Training provides employees with the key knowledge and skills that they need to perform best at their job. As the business world is continuously changing, organizations will need continue to provide their employees with needed training to perform at their best.

To this end,Softwareshop limited , has developed training programs with possible customization which include content specific to your requirements we develop with you and your staff.

Our Training Cources...

Employee IT Security Awareness
Using and Managing the INTRANET
Using Microsoft Word
Using Microsoft Excel
Using Microsoft Outlook
Using Microsoft Powerpoint
Using Microsoft Project
Optimizing Applications at Work
Optimising Social Media for Business
Customized Training

Our Training Methodology

CONSTRUCT → **COLLABORATE** → **EXPERIMENT** → **APPLY**

CONSTRUCT	COLLABORATE	EXPERIMENT	APPLY
The learninng begins with this component. The Instructor who is a subject matter expert is required to lead the learners here. This component introduces the learner to new concepts and thereby constructing his/her knowledge base. The instructor brings in concrete experiences for the learner through explanations & demonstrations.	This makes it possible for the learner to have contextual familiarity on the subject through collaborative learning. Here, the learner is provided with a mentor/direction/ and stimulus for reflective observation. The learner will reflect on the concepts learnt in the previous sessions and apply his/her understanding in the larger context.	The learner is exposed to active experimentation. The learner experiments his/her understanding of the concepts and observations to form a logical conclusion leading to better learning effectiveness and experience.	This learning component provides the environment for learners to develop conceptual clarity. Here, the learner learns, refers, compares, thinks and applies his/her entire knowledge spectrum and create solutions for real life scenarios.

Benefits

- Customized training onsite or at our facility, structured in-line with your specific needs.

- Training allows your staff to optimize the functionality within the software that they use, giving increased productivity in their jobs.

- Staff are motivated and encouraged when their company invests in increasing their productivity through training.

- Continuous training for your employees means your organization is able to stay ahead of the competition..

- Training can be cost effective, as it is cheaper to train existing employees compared to recruiting new employee with the skills you need.

- Both international and national research indicates that the increase in productivity resulting from targeted training can yield a return on investment of more than 30%.

- High productivity from your staff increases business output and can open a greater share of the market or expand it by improving products, services and reputations

SOFTWARESHOP LTD, will work with you from the start to understand your Business & Technology Objectives, so we can implement a **Sound Infrastructure Platform** to support all your current and future Technology needs. We will be with you all the way! A dedicated Account Manager and Technical Lead, will be assigned to your project(s) and they will assist with the design, implementation and management of each piece of the project from the site survey through to completion.

IT Management & Outsourcing

CERTIFIED SECURITY-PARTNER ★★

To keep your business moving with minimum downtime takes a carefully thought-out plan and continued assessment of your growth requirements. **PROACTIVE** is the keyword here.
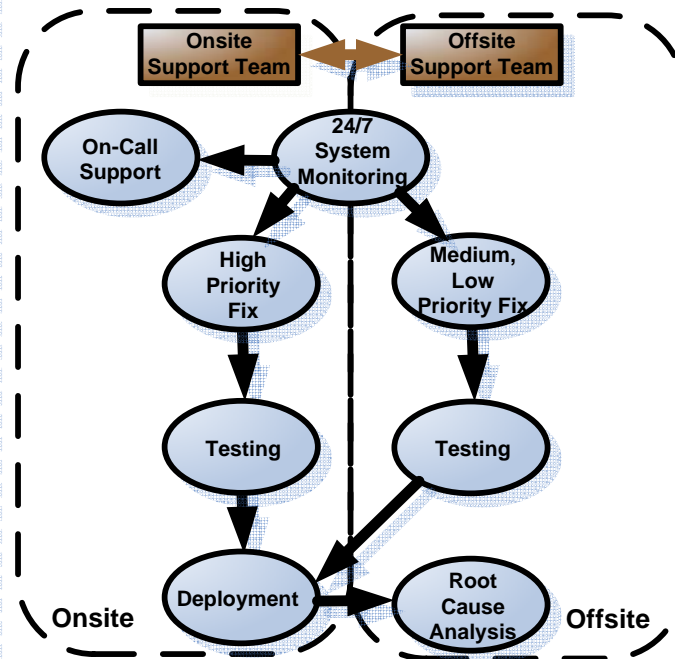

Our seamless maintenance and management strategy is one that allows us to use our pool of expert resources to manage several client sites with similar infrastructure simultaneously. Whichever configuration you choose, ONSITE, OFFSITE or BOTH, we always have our expertise at the point where and when needed.

Softwareshop Limited can help manage your IT environment completely (outsourcing) or **Augment** your current IT staff to provide **Strategic Consulting** on Management Operations and **Future Technology Direction**.

To keep your environment working at optimum capacity, you would need the expertise to ensure that this is done correctly. Instead of having several skill sets within your company to handle different parts of you infrastructure, how about you hand-off that headache to us, as we consider it a pleasure to do this work. This means you only have one entity to liase with and we take care of the rest.

Our seamless maintenance and management strategy is one that allows us to use our pool of expert resources to simultaneously manage several client sites with similar infrastructure. Whichever configuration you choose, ONSITE, OFFSITE or BOTH, we always have our expertise at the point where and when needed.

Onsite Support Team ⟷ **Offsite Support Team**

On-Call Support — 24/7 System Monitoring

High Priority Fix — Medium, Low Priority Fix

Testing — Testing

Deployment — Root Cause Analysis

Onsite | Offsite

We Manage & Support the following…

- Data Networks (LAN, WAN)
- Phone Networks
- Hardware Equipment
- Servers
- Desktops & Laptops
- Printers
- Central UPS & & Inverters
- Central AVRs
- CCTV Systems
- Access Control Systems
- POS Systems
- Business Applications
- Email Management
- Websites & Hosting
- Systems Security & Antivirus Mgt.
- Backup & Recovery Strategies
- Internet Connectivity
- Multi Office Inter-Connectivity
- User Training
- Business Process Re-engineering

Benefits

– Cheaper cost to outsource, as you do not have to employ different technology skill sets to support your business. We do it all.

– Outsourcing is also cheaper as you do not have to concern yourself with staff benefits, official cars, taxes, salaries, etc. Just **ONE FLAT FEE**.

– **Core Staff Activity**: Your staff is able to focus on their core activities, not worrying about who is responsible for supporting the IT infrastructure.

– **Experts**: Outsourcing gives you Expertise that may not be readily available in your staff. We are seasoned veterans of the trade and our expertise is at your disposal.

– **Continuity & Risk Management**: There is no fear regarding employee turnover. Outsourcing provides continuity in job function, as we are always readily available.

– **Develop Internal Staff**: Projects that require skills that your staff does not possess. On-site outsourcing of the project will bring people with the skills you need into your company. Your people can work alongside of them to acquire the new skill set.

Backup & Recovery Services

Can we stay in business in the event of disaster? This is a question CEOs should ask very often.

We carry out different Analysis (Risks, Threats, Impacts etc) of client's operations, design a customized solution, implement the solution and test the implemented solution to ensure your data is safe.

Recovery Services

We also perform advanced critical file recovery. We offer a **FREE** consulting advice on which backup solution match your business requirements.

- Password Recovery: We recover lost, forgotten password.

- Lost or Deleted Files: Either Accidental or intentional deletion of fles or formated Drive.

- Hard Drive Failure

Even if you already have a backup, can you recover it when you need it? Whether you are concerned about your critical data backup onsite or offsite, SOFTWARESHOP LIMITED can design a cost-effective backup solution that will suit your business needs. Because of our expertise in Data Recovery, our Backup Solution are geared towards easy recovery when needs arises. We actually implement a backup recovery operation as part of our implementation. You can never be sure of the integrity of your backups until you need to perform restore/recovery task.

Deploy Multiple Layer Backup for Critical Data!

Backups are a lot like
car safety features…...

Seat Belts

Anti-lock Brakes

Air Bags

We *hope* that we never need them….
BUT AFTER THE EVENT
We ***wish*** we had them all!

Disaster Recovery Protection
Recover from a complete server failure:
- Hardware Failure
- Theft
- Fire

Solution: ***Complete Server Backup/ Image***

Data Loss Protection

Recover data from historical points in time due to:
- Accidental or intentional deletion
- Application corruption
- Malware/ Virus infections

Solution: ***Archival Data & Application Backup***

Offsite Data Protection

"Last line of Defense" protection for when other backups fails, or when catastrophes that destroy your other backups, like:
- Earthquake
- Hurricane
- Flood
- Bushfires

Solution: ***Automated Offsite Backup***

Benefits

- Fully automatic – eliminates the human error factor
- Daily email reporting – peace of mind at a glance
- Emails a reminder when clients need to change backup media
- Built-in scheduling & media rotations make it easy
- Compatible with a wide variety of data storage options
- Simple point and click wizards for every function
- Restore data quickly and easily, just point and click
- Cost effective - less than 1/3 the price of competitor's products
- Simple OS recovery from bare metal: Using a boot disc, launch the Windows Recovery Environment (WinRE). Start the restore and the rest is automatic.
- Automatic disk management: Space occupied by old backups is automatically reused as the disk fills up.
- Fast incremental images: Enables frequent images to reduce the window of potential data loss.
- Free technical support – if and when you need it!
